chemotaxis (n=34)
cytoplasmic translation (n=54)
bacterial-type flagellum-dependent cell motility (n=37)
translation (n=101)
bacterial-type flagellum organization (n=18)
purine nucleotide biosynthetic process (n=17)
ribosomal large subunit assembly (n=26)
de novo IMP biosynthetic process (n=12)
protein secretion by the type III secretion system (n=9)
proton motive force-driven ATP synthesis (n=9)
ATP biosynthetic process (n=9)
bacterial-type flagellum assembly (n=22)
regulation of cell shape (n=48)
respiratory electron transport chain (n=25)
peptidoglycan biosynthetic process (n=49)
proton motive force-driven plasma membrane ATP synthesis (n=8)
protein transport (n=67)
aerobic respiration (n=25)
heme transmembrane transport (n=8)
dipeptide transport (n=15)
